| Price | $404.10 | $1,277.99 | $699.99 |

# Legion Y730-Erika

1. Processor
   a. 2.2 Ghz
   b. 6 cores
   c. Lenovo
2. Monitor
   a. 17 inches
   b. 1920x1080
3. Memory (RAM)
   a. 16 GB
4. Hard drive
   a. 1 TB
   b. HDD

# We chose the Legion Y730

# Here's why

We chose this computer because it has the fastest processor and because he is a game developer he would need a fast processor for his job. Also he has 16GB of ram that he could use to his advantage as well. So this was the choice because it was a all around faster computer. It is also capable of the software programs such as OBS and Steam that our client would need in his everyday life
